    This graph contains weighted results.

[^48]:    *Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; \mathrm{B}>\mathrm{W}, \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^49]:    *Such as Coke, Pepsi, or Sprite, not counting diet soda or diet pop, during the 7 days before the survey

[^50]:    *During the 7 days before the survey

[^51]:    *In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>10$ th, 9 th $>11$ th, 9 th $>12$ th; $\mathrm{W}>\mathrm{H}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^52]:    *In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey ${ }^{\dagger}$ F > M; 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; B > W, H > W (Based on t-test analysis, p < 0.05.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^53]:    *In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey ${ }^{\dagger} \mathrm{M}$ > F; 9th > 11th, 9th > 12th, 10th > 12th; B > H (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^54]:    *Counting time spent on things such as Xbox, PlayStation, an iPad or other tablet, a smartphone, texting, YouTube, Instagram, Facebook, or other social media, for something that was not school work, on an average school day
    ${ }^{\dagger}$ Increased 2015-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]
    This graph contains weighted results.

[^55]:    *One or more times during the 12 months before the survey
    ${ }^{\dagger} \mathrm{M}$ > F; B > W, H > W (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^56]:    *One or more times during the 12 months before the survey

[^57]:    *Other than HIV, such as chlamydia or gonorrhea, during the 12 months before the survey
    
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^58]:    *F > M; 10th > 9th, 11th > 9th, 12th > 9th; H > B, H > W (Based on t-test analysis, p < 0.05.) All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^59]:    *On an average school night
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 9$ th $>10$ th, 9 th $>11$ th, 9 th $>12$ th, 10 th $>11$ th, 10 th $>12$ th (Based on t-test analysis, $\mathrm{p}<0.05$.) All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^60]:    *During the 12 months before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; 11th $>9$ th, 12 th $>$ 9th, 12 th $>10$ th, 12 th $>11$ th; $\mathrm{W}>\mathrm{B}, \mathrm{W}>\mathrm{H}($ Based on t-test analysis, $\mathrm{p}<0.05$.
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^61]:    *During the 12 months before the survey
    ${ }^{\dagger}$ Increased 2003-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p $<0.05$ ). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
    This graph contains weighted results.

[^62]:    *During the 12 months before the survey, among students who had ridden a bicycle
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; 12$ th $>9$ th, 12 th $>10$ th, 12 th $>11$ th; $\mathrm{B}>\mathrm{W}, \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^63]:    *During the 12 months before the survey, among students who had ridden a bicycle
    ${ }^{\dagger}$ Decreased 2007-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
    This graph contains weighted results.

[^64]:    *Such things as being told who they could and could not spend time with, being humiliated in front of others, or being threatened if they did not do what they wanted, during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; H > B , H > W (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^65]:    *Such things as being told who they could and could not spend time with, being humiliated in front of others, or being threatened if they did not do what they wanted, during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey
    This graph contains weighted results.

[^66]:    *Such things as being told who they could and could not spend time with, being humiliated in front of others, or being threatened if they did not do what they wanted, during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey
    ${ }^{\dagger}$ No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]
    This graph contains weighted results.

[^67]:    *One or more times during the 12 months before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; 10th > 9th, 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th; H > W (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^68]:    *Such things as kissing, touching, or physically forcing them to have sexual intercourse, among students who dated or went out with someone during the 12 months before the survey
    ${ }^{\dagger}$ Decreased 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]
    This graph contains weighted results.

[^69]:    *Such as cutting or burning themselves on purpose one or more times during the 12 months before the survey
    ${ }^{\dagger}$ F > M; 9th > 12th, 10 th > 12th, 11 th > 12th (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^70]:    *Such as cutting or burning themselves on purpose one or more times during the 12 months before the survey

[^71]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax, one or more times during their life

[^72]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax, one or more times during the 30 days before the survey
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; \mathrm{H}>\mathrm{B}, \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^73]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax, one or more times during the 30 days before the survey ${ }^{\dagger}$ Decreased 2011-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]
    This graph contains weighted results.

[^74]:    *During the 12 months before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; 11th $>9$ th, 11 th $>12$ th; $\mathrm{W}>\mathrm{B}, \mathrm{W}>\mathrm{H}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^75]:    *Also called fasting, during the 30 days before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; H > W (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^76]:    *During the 30 days before the survey

[^77]:    *During the 30 days before the survey

[^78]:    *Such as sports drinks (for example, Gatorade or PowerAde), energy drinks (for example, Red Bull or Jolt), lemonade, sweetened tea or coffee drinks, flavored milk, Snapple, or Sunny Delight, not counting soda or pop, one or more times per day during the 7 days before the survey
    ${ }^{\dagger} \mathrm{M}>\mathrm{F} ; \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^79]:    *During the 30 days before the survey

[^80]:    *During the 30 days before the survey
    ${ }^{\dagger} \mathrm{H}>\mathrm{B}, \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^81]:    *During the 12 months before the survey
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; 9th > 10th, 9 th $>11$ th, 9 th $>12$ th, 10 th $>12$ th, 11 th $>12$ th; $\mathrm{B}>\mathrm{W}, \mathrm{H}>\mathrm{W}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^82]:    *F > M; 9th > 11th, 9th > 12th; B > W, H > W (Based on t-test analysis, p < 0.05.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^83]:    9th > 10th, 9th > 11th, 9th > 12th, 10th > 12th; B > H, B > W (Based on t-test analysis, p < 0.05.)

[^84]:    *Decreased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]

[^85]:    ${ }^{*}$ F > M; 9th > 10th, 9th > 11th, 9th > 12th, 10th > 11th, 10th > 12th, 11th > 12th (Based on t-test analysis, p < 0.05.)

[^86]:    *Decreased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]

[^87]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax
    ${ }^{\dagger} \mathrm{F}>\mathrm{M}$; W > H (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^88]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax

[^89]:    *Decreased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ( $p<0.05$ ).]

[^90]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax
    ${ }^{\dagger} \mathrm{F}>\mathrm{M} ; \mathrm{W}>\mathrm{B}, \mathrm{W}>\mathrm{H}$ (Based on t-test analysis, $\mathrm{p}<0.05$.)
    All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
    This graph contains weighted results.

[^91]:    *Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax

[^92]:    *During the 7 days before the survey
